

Hello Oak Class!

Here is your homework for this term. You can be as creative as you like. If you need some resources, which we might have in school, please come and ask me — I will do my best to help out!

Homework is due in on Monday 17th July.

Have fun!

Design a Product

Put on your Apprentice hats and design a product that could be sold all over the world. It could be a new game, a food product, clothing or anything you can think of. You need to design it, create a brand logo (like the ones below) and if you get time, design and create packaging for it. Be prepared to present your product in front of others.

Evolution and globalisation

A Puppies' Parents!

Find pictures of two different dogs. List all the features of your two dogs. For example, short tail, fluffy tail, brown nose, pink nose, spotty coat, curly coat. Now take features from each parent to create a puppy. If you take short tail from one parent, don't also take fluffy tail. Draw a picture of your new puppy. Does it look like its parents? Create another puppy in the same way choosing other features. How many different puppies can you create?

Global Brands

Collect cardboard packaging of different global branded items. These could be food items such as Mars or Cadbury, fast food packaging or any household product with a well-recognised label. Create a collage with all of these items. It can be 3-D, 2-D or even computer generated.

Computer generated collages can be sent on Class Dojo to print at school.

Charles Darwin's Beagle Voyage

In the 1830s Charles Darwin made a round the world trip in a ship called The Beagle to learn about variation. Make a poster or leaflet about his voyage. Information you could include:

- What was his ship like?
- How long did he travel for?
- Where did he stop on his journey?
- What did he discover and find out?

You must include a list of websites/books you use.
