

# Ash Class Creative Homework

Here is your homework for this term, focussing on Water and Weather. Please choose and complete at least one of these exciting tasks. If you need any resources from school please let me know and I will be more than happy to help you out. I am looking forward to seeing the amazing things you create!

**Due by: Thursday 23rd May**

## Become a Water Conservationist

Think of the different ways in which you could save water at school or at home.

Write a list ways to inform people of how to save water. You could also create a poster to encourage other people to save water too!

Here are a list of ways you can do so:

[think2onow.com/water\\_conservation\\_tips\\_kids.php](http://think2onow.com/water_conservation_tips_kids.php)

## Produce a Weather Report

Become a meteorologist and produce your own weather report. You may wish to write this down, or you could film it and send it in!

You could use the actual weather forecast, or make up your preferred weather for a day.

This is a great website to help you get started:

[Create your own TV weather report | Discovery Place Kids Huntersville](#)

## Do the Weather Dance

You could learn the weather dance, which is provided in the link, or create your own weather dance.

Think about how each weather might move and what types of sounds they might make.

You can show us at school or send in a video!

[\(9\) Do the Weather Dance: Song and Dance for Kids - YouTube](#)

## Create a Weather Record

You could record the weather over the period of a week, and write up your findings. What is the weather generally like in England?

Did you experience more of one type of weather than another? Did it rain more? What were the temperatures like each day?

This video has some great ideas on how to be a weather watcher: [Be a Weather Watcher | Weather Science | SciShow Kids \(youtube.com\)](#)

## How do the seasons change the food we eat?

Different foods grow better at different times of year.

Take a look at the seasonal foods. [What is seasonal food? - BBC Bitesize](#)

Can you create a list of foods grown in each season?

Maybe you could use these foods to think of a recipe for each season. You could even make one!
